Projects

Face Recognition Web Application

11th Oct 2024 - 27th Nov 2024

- Developed a real-time facial recognition app using face-api.js for detection and recognition.
- Enabled image uploads, labeling, and persistent storage with LocalStorage for offline use.
- Built a responsive UI with dynamic elements, including a collapsible navbar and real-time notifications.
- Enhanced user experience with intuitive feedback and easy access to labeled data.
- Technologies: JavaScript, face-api.js, HTML, CSS, LocalStorage

React-Based Quiz Application

8th Dec 2024 - 17th Dec 2024

- Developed a dynamic quiz application using React, integrating Node.js and Express for the backend.
- Fetched and served quiz data through an external API, providing real-time updates and content management.
- Implemented features like timed questions, immediate feedback, detailed explanations, and progress tracking for an engaging user experience.
- Designed a responsive UI with Tailwind CSS, ensuring compatibility across devices.
- Built a comprehensive score summary and detailed performance report at the quiz end.
